Bartans (Pty) Ltd

Company Profile

1

Who we are

Bartrans is an independently owned company with its head offices in Johannesburg, South Africa. The company also has satellite offices in Cape Town and Durban along with a large multi-skilled partner base supplying coverage throughout South Africa and various other African countries.

As a leading strategic business partner to Honeywell Scanning & Mobility, Datamax O'Neil, Intermec, Zebra Technologies, Mojix and the Bartender brands, Bartrans is well positioned to grow both domestically and within the African continent. Its existing operational interests and solutions in various industry sectors including Manufacturing, Retail, Transport & Logistics, Agriculture, Security and other verticals provide a base for growth in all automatic identification applications and related markets.

Areas of activities

Bartrans directly imports and offers value added services to a comprehensive array of both hardware and software products, thus enabling us to not only provide composite solutions but also do so at an affordable price.

Barcode Scanners:

From point-of-sale to industrial scanners we are able to offer both tethered and cordless scanners offering both 1D and 2D scanning capabilities. Using the technology at our disposal we can decode even the most challenging of symbols in applications like Direct Part Marking, Cellphone displays, damaged codes etc.

Barcode printers & Media:

Bartrans imports, sells and services a wide range of desktop, mid and high range thermal transfer and direct thermal printers. We also offer portable printers and card printers along with Bartender software enabling the customer to design and print their own labels/cards.

Bartrans has a sister company that manufactures self-adhesive labels for the above mentioned barcode printers and is thus in a good position to offer the consumables used in the printer. As an authorized service and repairs center Bartrans is able to tie this consumables offering into on and off-site Service Level Agreements thus further reducing costs for the customer.

Mobile computing:

Enterprise customers know that new technologies are needed to address the most demanding business problems today, and our computers can be relied upon to stand up to the rigors of the toughest applications. Bartrans has mobile and stationary computers that are known for their rugged design, reliable performance and inclusion of state-of-the-art technology to support a large variety of in-premise and in-field applications within manufacturing,

warehousing, transportation and logistics. Cost of ownership after installation can be kept low through use of advanced device management tools.

Hazardous environment Computing:

Bartrans offers the eCom range of specialized hardware that is certified for use in intrinsically safe environments like oil refineries or petrol forecourts and cold store applications like blast freezers etc. This equipment is purpose built for the harshest of environments.

RFID [Active & Passive]:

Our fixed, handheld and vehicle-mount readers, printers, tags, labels and inlays are supported by RFID implementation services to guarantee system performance. Whether your application is tracking a vehicle through production and into the stockyard, or people tracking on a site for health and safety compliance and muster areas, we have a solution for you.

OEM:

Many of the world's leading manufacturers of data collection computers, kiosks, blood analyzers, robotic automation, medical instruments and countless other applications, choose our scan engines for their product designs that call for embedded, high-performance data collection technology.

Software Solutions

Bartrans offers a full suite of, Inventory control and Asset Management packages through our partner base to suit any size organization. We have entry level systems for small businesses and enterprise level, multi-site, multi-principal environments for larger businesses. All of our systems are backed by our various levels of after sales service and support contracts are available.

We specialize in the scanning and decoding of the South African driver's license offering either complete solutions to end-users or the codecs required to decrypt the licenses to software developers and the hardware required to scan the barcode.

Solutions Division

With a view to business process automation, this unit is equipped to undertake business surveys and compile functional specifications of user requirements.

We would welcome the opportunity to discuss this service, of not only consulting on the requirements, but also providing solutions, through our international partners, who provide us with products that have a proven track record in the industry, of transaction recording and data collection using bar code scanners and mobile computers.

Profile

Bartrans as a company operates within the complex and challenging economic and social landscape that characterises the South African IT Market. Added to this responsibility is the continued and unwavering dedication to our current customers, as well as satisfying the demands of a knowledgeable and potentially new customer base.

Bartrans is comprised of four directors viz.

John Grisdale
Simon Grisdale
Timothy Grisdale
Luke Dunstan

Bartrans' Board of Directors all bring significant technical and business expertise to the company, ensuring that both the technical and the social targets will have a meaningful impact on the present and future status of the company.

The Directors of Bartrans are supported by our Management team and dedicated employees.
